Do you sometimes wonder why your dowsing results are not as accurate as you expect them to be? While no dowser is one hundred percent accurate one hundred percent of the time, there may be ways for you to get better results. Susan will share embarrassing mistakes and experiences from her more than twenty years as a professional dowser and offer some practical tips on how to improve your dowsing.

She recently updated her well-known Dowsing Protocol with a single word that she believes will improve results. (Available on request from [susan@dowser.ca](mailto:susan@dowser.ca) with "Protocol" in the subject line.)

Susan is an internationally acclaimed author, consultant and workshop leader with a dynamic, professional practice. She uses traditional dowsing tools as well as the power of heart and thought to detect and transform nonbeneficial Earth, Environmental, Psychic and Other energy patterns. She has led workshops and presented at in-person conferences across North America, the UK, in Italy, Japan and in the Middle East and was featured in *"The Resonance"* documentary. Susan is a Past President and Dowser of the Year of the Canadian Society of Dowsters. She is an ordained Metaphysical Minister.
